WONDERGLASS

A hand-blown glass cylinder is precisely nested inside a slightly larger outer cylinder, which flares gently at its base to create a subtle sculptural profile. The lamp directs a focused stream of light downward while its transparent crystalline form softly radiates along its full length, creating a delicate glow that balances functionality with quiet elegance. The interplay of layered glass surfaces introduces subtle depth and dimension, transforming a simple form into a luminous, minimalist sculpture.

## MATERIALS

**Pendant** | Blown borosilicate handcrafted

**Holder** | Metal

## COLOURS

**Pendant** | Crystal

**Holder** | Nickel | Black

## DIMENSIONS

**S1** Ø 150 x H 175 MM | 1 Kg
